

CZ2004 HCI Tutorial 3

Q1. Ethnographic Observation

1. What are the steps in an ethnographic observation study?
2. Elaborate on the “field study” step.

Q2. Low- and high-fidelity prototyping.

1. Describe the difference between low-fidelity and high-fidelity prototypes.
2. When should a low-fidelity prototype be used, and when a high-fidelity prototype is preferred?

Q3. Evaluation I.

1. Describe the term “Evaluation During Active Use”.
2. Give two examples of how to use this evaluation strategy.

Q4. Evaluation II.

1. In the lectures, we discussed about five commonly used strategies for the evaluation of user interfaces. List their names.
2. Use a chart to organize important contents inside the “Evaluation of User Interfaces”.
